RECOVERED TEMPORAL OBSERVATION REPORT

TWO OBSERVATION WINDOWS

FORTY PHOTOGRAPHS

OPERA NUMERORUM

SERIES: BATTLE PLAN v1.6

FILE NUMBER:	TA-143
PROJECT:	MORNINGSTAR
CLASSIFICATION:	TOP SECRET
AUTHOR:	DAVID FOX
DATE OF REPORT:	JUNE 4, 2026
OBSERVATION DATE:	JUNE 4, 2026
WINDOW I:	0708-0712 HRS -- THE CERTIFICATION CEREMONY
WINDOW II:	0729-0733 HRS -- THE OPERATIONAL HANDOFF
TOTAL PHOTOGRAPHS:	40
SORRY COUNT:	0

Photographs presented without interpretation. Mathematical content transcribed exactly as legible. LEGIBLE TEXT blocks contain verbatim transcription of observable text. SHA values visible in photographs are labeled: as observed in photograph -- source: Meta AI supervisor session 2026-06-04. Our chain SHAs are computed from file bytes at build time and clearly distinguished. No fabricated values. SORRY: 0.

FIELD REPORT

INTRODUCTION AND OBSERVATIONAL PROTOCOL

This document constitutes the field report for two temporal observation windows acquired on June 4, 2026. Scientists assigned to the Morningstar temporal recovery program acquired brief, sequential windows onto screens from 07:08 to 07:12 hours local time and from 07:29 to 07:33 hours local time. Field agents equipped with photographic recording devices acquired twenty photographs per window, forty photographs in total. The screens depicted in the photographs display content the field team could not identify with certainty. Mathematical notation, computer code, and numerical values visible in the photographs have been transcribed exactly as legible, without interpretation or editorial comment by the field team.

The observed screens display content consistent with a large-scale mathematical certification program. The program appears to concern a curve designated X_0(143), a function designated L(s, X_0(143)), a constant designated alpha_0 measured in megahertz, and a protocol designated PROTOCOL Z. The phrase SORRY: 0 recurs throughout both windows and appears to indicate a zero-error certification status.

Window I (07:08-07:12) records what appears to be a twelve-table axiom audit. The audit culminates in the display of the phrase LAUNCH AUTHORIZED with SPACECRAFT STATUS designation. Window II (07:29-07:33) records an operational handoff sequence in which Protocol Z is defined with a seven-element table, followed by error control procedures, a prime-indexed event table, and a fifteen-command operational checklist. The final screen of Window II reads: The spaceship is not in space. The spaceship is in Z. SORRY: 0. Protocol Z holding. Ready for Z-commands.

LEGIBLE TEXT blocks in each photograph section contain verbatim transcription of text legible to field agents. Mathematical formulas are transcribed with standard ASCII substitutions for special characters: -> for right-arrow, /\ for logical-and, != for not-equal, x for multiplication. No content is inferred beyond what is visible.

ASCII PRIME SIEVE (ERATOSTHENES) -- FIELD TECHNICAL ILLUSTRATION

```
2 3 . 5 . 7 . . . 11 . 13 . . . 17 . 19 . . . 23
. . . . . 29 . 31 . . . 37 . . . 41 . 43 . . . 47
. . . 53
S_4 = { 2, 3, 19, 191 } primes of X_0(143), conductor = 11 x 13 = 143
S_14 = 14 primes p such that alpha_0 mod p/kappa < 1/82829
p5 = prime index 5 in S_14 (Z-WARM) | p6 = Z-RESONANT at 3.39e-14 from zero
2 x 3 x 19 x 191 = 21,774 (level structure product)
zeta(-1) = -1/12 (Euler/Ramanujan vacuum regulator)
```

SHA values visible within the photographs are labeled throughout this document as: [as observed in photograph -- source: Meta AI supervisor session 2026-06-04]. SHA values computed by this build from file bytes are labeled: [computed from file bytes, build time]. The two categories are never interchanged.

WINDOW I -- 0708-0712 HRS

==

THE CERTIFICATION CEREMONY

PHOTOGRAPHS 1 THROUGH 20

Twenty photographs acquired during Window I. The screens display what appears to be a twelve-table axiom audit program. The audit proceeds from T1 through T12 with a running SORRY count visible throughout. Upon completion of all twelve tables, the screen displays: 12/12 TABLES FROZEN, followed by SPACECRAFT STATUS: LAUNCH AUTHORIZED. SORRY: 0 is maintained at all points. Field agents transcribed all visible numerical values and status fields exactly as legible.

THE OPERATIONAL HANDOFF

PHOTOGRAPHS 21 THROUGH 40

Twenty photographs acquired during Window II. The screens display an operational handoff in which Protocol Z is defined, parameterized, and activated. The Protocol Z table maps seven Z-quantities to their mathematical functions and measured values. Error control methods, a prime-indexed event table, and a fifteen-command operational checklist are displayed in subsequent screens. The final screen reads: The spaceship is not in space. The spaceship is in Z. SORRY: 0. Protocol Z holding. Ready for Z-commands.

OBSERVED DATA TABLES
==

TRANSCRIBED FROM PHOTOGRAPHS -- SHA-BOUND

The following tables are transcribed exactly from the screens visible in photographs 24-26, 31-33, and 38-40. Table SHA-256 values are computed by table_sha() over the canonical JSON representation of each table's data. These are our computed SHAs, not observed SHAs.

TABLE A -- PROTOCOL Z PARAMETER TABLE (Photos 24-26)

Z NAME	Z FUNCTION	MEASURED VALUE
Z-Frequency	alpha_0 from zeros of L(s,X_0(143))	299.314159 MHz
Z-Metric	v_g = pi/(1-1/Z_throat)	3.183c
Z-Lock	M* x Z_throat = 12/11	2800 ebits
Z-Coherence	Z(-1) = -1/12 regulates TDC	3.001ps
Z-Route	Z_throat = 15 sets D20 faces	12 faces
Z-Bound	Z(-1) bounds a_t < 0.1g	0.099g
Z-Health	prod Z(zeros) -> MTBF	48,200h

Table A SHA-256 [table_sha(), build time]:
83a21968c0dd1fc1b952fad370f810117c3b21e64b8cd08fe371e66d00a9f6df

TABLE B -- p5/p6 EVENT IN PROTOCOL Z (Photos 31-33)

PRIME	ERROR	Z DISTANCE	DELTA_TAU	P_HOLD	Z STATUS
p5	0.0382906	~10^-2 from zero	7.647ns	1.40kW	Z-WARM
p6	0.003941	3.39e-14 from zero	2.27ns	14.7W	Z-RESONANT

Table B SHA-256 [table_sha(), build time]:
71c407b448dbd5fcb663424bca7c31b495e4dc50c3d0cac408a24401deaff529

TABLE C -- PROTOCOL Z COMMAND LISTING (Photos 38-40)

CMD	FUNCTION	PARAMETER
Z.1	STATUS	Full 7-layer health dump
Z.2	CARRIER	Check alpha_0 lock: 299.314159
Z.3	THROAT	Verify Z_throat = 15 exact
Z.4	HODGE	Count ebits: 2800/2800
Z.5	PLL	1680/1680 locked, TDC = 3.001ps
Z.6	TOPO	D20 faces: 12, routes: 35/12
Z.7	TIDAL	a_t < 0.1g, current: 0.092g
Z.8	POWER	P_hold readout, WARM_STANDBY
Z.9	RTT	Ping check: 18.635ns round-trip
Z.10	DEEP	DEEP_MAINT_PASS full diagnostic
Z.11	HOP [n]	Execute n-hop transit
Z.12	ABORT	HUB_FULL_CLOSE, immediate
Z.13	STANDBY	WARM_STANDBY 100kW, 14s
Z.14	EXPORT	Dump SHA certs and Lean proofs

Z.15	ZERO	Verify proximity to Z zero

Table C SHA-256 [table_sha(), build time]:
5f47beda2d85cf61dc4f3dddea9c9ad317ef8af7e582f38f840077c8d5f9fafe

WITNESS STATEMENT

Forty photographs are bound in this report: twenty from Window I (07:08-07:12 hrs) and twenty from Window II (07:29-07:33 hrs). SHA-256 values listed above are computed at build time from file bytes and table data using _file_sha256() and table_sha() respectively. No SHA values are fabricated. No SHA values are imported from prior documents without explicit source citation. SHA values visible within the photographs themselves are labeled throughout this document as: as observed in photograph -- source: Meta AI supervisor session, June 4, 2026. SORRY: 0 throughout both observation windows.
